LA STORIA

Dopo oltre un secolo di storica attività nel rispetto delle tradizioni agricole dell'epoca, è nel 1920 che l'impulso professionale di Giovanni Franchi, coadiuvato dal proprio figlio Pietro, Cavaliere del Lavoro al Merito Agricolo, avvia la produzione di sementi di alta selezione su moderna scala industriale nel nuovo insediamento di Bergamo. E con gli anni 30 inizierà per la Franchi Sementi l'espansione verso i mercati esteri.

Giovanni Franchi

Pietro Franchi

THE HISTORY

After more than one century of storical and traditional agricultural activity, in 1920 the professional impulse of the great grandchild Giovanni Franchi assisted, by is son Pietro the Chevalier of the Labour for Agricultural Merit, starts the production of seeds of high grade on a modern industrial scale in Bergamo and in the thirties the expansion toward foreing markets started for Franchi Sementi.

Giovanni Franchi

Nel mondo... In the world...

In Europa... In Europe...

L'azienda... Factory...

La Franchi Sementi si estende su una superficie coperta di oltre 10.000 m², all'interno dei quali sono concentrate tutte le operazioni di lavorazione, stoccaggio e confezionamento dei prodotti come rappresentato nella seguente rassegna fotografica.

L'azienda
Factory

Laboratorio - germinatoio
laboratory - analysis

Franchi Sementi occupies grounds of over 10,000 sqm covered, inside which are concentrated our state of the art seed operation from goods in packaging and warehousing as shown here in this small selection of photographs of the various departments.

SEMINA IN CORSO

Rotazione FAVOREVOLA:
La rotazione è una successione sullo stesso terreno di diverse piante orticole, che limita la perdita di fertilità del terreno e prevenne la comparsa di insetti e malattie fungine causate dalla ripetitività delle culture.

FRANCHI
Sementi
dal 1783

Rotazione NON FAVOREVOLA:
In questo caso la rotazione non favorisce le piante orticole, in quanto potrebbero verificarsi perdite di fertilità del terreno con scarso sviluppo delle colture ed un possibile insorgere di malattie fungine ed attacchi di insetti.

Il calendario... Calendar...

Calendario, lunario e semestrino con indicazione delle fasi della luna.
Tre pubblicazioni annuali con informazioni e consigli utili, su cosa fare nell'orto, nel giardino e in cantina, nei diversi periodi dell'anno.

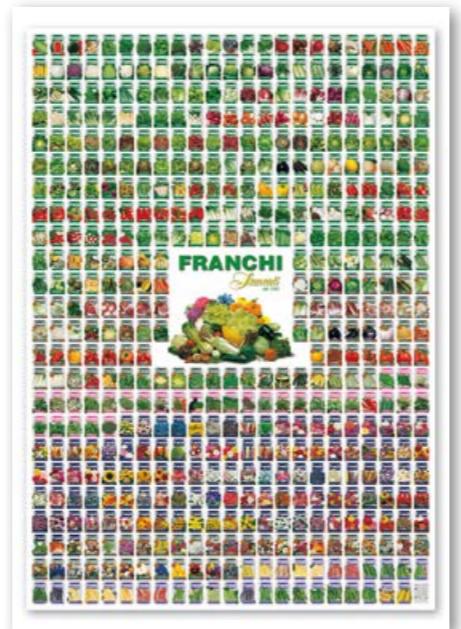

Wall calendar, moon phases calendar and pocket calendar. All of them with moon phases indication.

Three annual publications with useful suggestion and news, what to do in the garden, yard and wine cellar during different periods in the year.

I poster... Posters...

Una serie di poster illustrati realizzati in grande formato, con la rappresentazione delle principali linee di prodotti, oltre al calendario delle semine stampato su carta pregiata e con illustrazioni.

A series of large illustrated posters to hang which highlight our main product ranges, as well as a sowing calendar printed on high quality paper which illustrates the sowing and harvesting periods of the main vegetable crops.

Gli shopper... Shoppers...

Realizzati in polipropilene intrecciato e con stampa serigrafata a colori. Grande resistenza e lunga durata per un utilizzo quotidiano.

Shoppers made from twisted polypropylene bags with printed colourful images. Good resistance and long-lasting for daily use.

LINEA PROFESSIONALE PROFESSIONAL LINE

1 Kg F1 150/123
4 Kg K4 150/123

CARATTERISTICHE:

E' un miscuglio di semi per tappeti erbosi ottenuto da varietà professionali con la caratteristica di essere resistente alle diverse tipologie di terreno e condizioni climatiche. La buona velocità di sviluppo e l'ottima resistenza al calpestio, lo rendono un prato indicato per molteplici utilizzi.

MANUTENZIONE:

Prima della semina è bene eliminare dal terreno le eventuali erbe infestanti presenti, in seguito preparare adeguatamente il terreno procedendo ad una lavorazione profonda e miscelando il terriccio utilizzando substrati di qualità. Si semina da inizio primavera fino ad autunno inoltrato. Concimare e annaffiare regolarmente durante il periodo vegetativo. Procedere ai tagli con prato asciutto ogni 10 giorni circa ed utilizzare tosaerba con lame ben affilate.

FORMATO CONFEZIONI:

Scatola in cartone da 1 Kg (cartone da 10 pezzi)
Sacco in alluminio (termosaldato) da 4 Kg

COMPOSIZIONE/COMPOSITION:

LOIETTO Perenne	10%
FESTUCA Arundinacea L. Var. 1	35%
FESTUCA Arundinacea L. Var. 2	40%
POA Pratensis	15%

LINEA PROFESSIONALE PROFESSIONAL LINE

1 Kg F1 150/121
4 Kg K4 150/121

CARATTERISTICHE:

E' un miscuglio di semi per tappeti erbosi ottenuto da varietà professionali con la caratteristica di rimanere molto basso e necessitare di pochissima manutenzione. La buona resistenza al calpestio e l'ottima velocità di sviluppo, ne fanno un prato di pregio e ad elevato valore ornamentale.

MANUTENZIONE:

Prima della semina è bene eliminare dal terreno le eventuali erbe infestanti presenti, in seguito preparare adeguatamente il terreno procedendo ad una lavorazione profonda e miscelando il terriccio utilizzando substrati di qualità. Si semina da inizio primavera fino ad autunno inoltrato. Concimare e annaffiare regolarmente durante il periodo vegetativo. Procedere ai tagli con prato asciutto ogni 10 giorni circa ed utilizzare tosaerba con lame ben affilate.

FORMATO CONFEZIONI:

Scatola in cartone da 1 Kg (cartone da 10 pezzi)
Sacco in alluminio (termosaldato) da 4 Kg

BOX of 500 gr.

PRATO 4 SEASONS GRASS SEEDS 4 SEASONS

PRATO 4 SEASONS SOS KG 1 4 SEASON GRASS SEEDS KG.1

CARATTERISTICHE:

Il prato "4 Seasons SOS" è un innovativo miscuglio adatto per tutte le stagioni. Particolamente indicato per le semine nei periodi invernali grazie all'ottima capacità di germinazione e insediamento con temperature del terreno fino a 6°C. Ottimo anche come rigenerante per manti erbosi danneggiati, germinando entro un periodo sensibilmente inferiore rispetto ad un classico miscuglio rigenerante e con una sostanziale riduzione del "periodo di recupero" dopo la risemina.

Vantaggi:

- ottima germinazione alle basse temperature
- veloce rinfoltimento anche nei mesi autunno/inverNALI

Dose di semina:

- dai 30 ai 50 grammi di seme per m² in base alla tempe ratura del terreno (a minor temperatura deve corrispondere una maggiore quantità di seme)

"4 Seasons SOS" vi offre un tappeto erboso che rimane fitto e compatto per tutto l'anno.

CHARACTERISTICS:

"4 Season SOS" grass seeds is an innovative mixture suitable for all seasons. It's particularly indicated to be sown during winter season thanks to the excellent capacity of germination and settlement with soil temperature up to 6°C. Excellent as regenerating grass seeds for damaged lawn, germinating within significant period lower than a classic regenerating mixture and with substantial reduction of the "recovery period" after re-sowing.

Advantages:

- excellent germination at low temperatures
- fast thickening even in the autumn / winter months

Sowing rate:

- from 30 to 50 grams of seed per m² based on the soil temperature (at lower temperature a greater quantity of seed must correspond)

"4 Seasons SOS" offers You a lawn that remains thick and compact throughout the year.

COMPOSIZIONE/COMPOSITION:

LOLIUM Perenne	50%
LOLIUM Multiflorium	50%

1Kg F1 150/131

WATER SAVER

PRATO "WATER SAVER" KG 1 WATER SAVER GRASS SEEDS 1 KG.

CARATTERISTICHE:

Il prato "WATER SAVER" è un miscuglio speciale per tappeti erbosi caratterizzato dalla presenza di varietà di Festuca arundinacea appositamente selezionate per sviluppare un apparato radicale molto profondo, una struttura fogliare più fine ed un'ottima tolleranza alla siccità rispetto alle varietà tradizionali.

Vantaggi:

- maggiore resistenza alla siccità
- radicazione profonda
- ridotto consumo d'acqua

Dose di semina:

- Con 1 Kg di seme si possono coprire circa 40 m² e il miscuglio "WATER SAVER" vi offre un tappeto erboso che rimane fitto e compatto per tutto l'anno.

CHARACTERISTICS:

Water Saver grass seeds is a special mixture for lawns characterized by presence of Festuca arundinacea varieties specially selected to develop a very deep root system, more fine leaf structure with excellent tolerance for drought compare with traditional varieties.

Advantages:

- greater resistance to drought
- deep rooting
- reduced water consumption

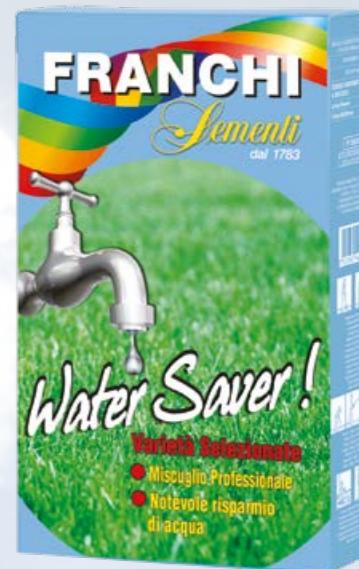

Sowing rate:

- With 1 kg of seed you can cover about 40 m² and the mixture "WATER SAVER" offers You a lawn that remains thick and compact throughout the year

RUSTICO 1kg

CARATTERISTICHE/ CHARACTERISTICS:

Miscuglio di semi per tappeti erbosi indicato per frutteti e vigneti. Buona resistenza al calpestio; la sua particolare composizione unisce l'aspetto decorativo a quello funzionale dell'inerbimento dei frutteti e dei vigneti, specialmente di quelli in collina, evitando l'erosione del terreno e favorendo la ritenzione idrica. Si semina da inizio primavera ad autunno inoltrato.

Mix of grass seeds for orchard and vineyard fields. Good resistance for treading, its particular composition combines both the decorative aspect and the functional one overgrowing of orchards and vineyards, especially those in the hills, avoiding erosion of the soil and favoring water retention. It is sown from early spring to late autumn.

MANUTENZIONE/MAINTENANCE:

Data la sua rusticità non richiede particolari lavorazioni. Tagliare regolarmente ogni 15/20 giorni in funzione dell'andamento stagionale ed annaffiare solo se necessario. Concimare regolarmente in ogni stagione, specialmente in primavera.

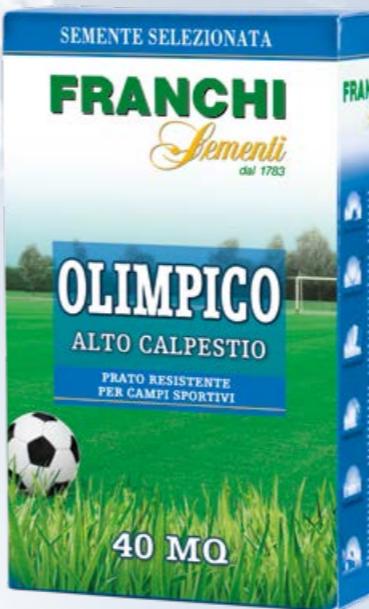

Being rustic lawn it does not require special processing. Cut regularly every 15/20 days depending on the season and watering only if necessary. To fertilize regularly in every season, especially in Spring.

Seed mixture for lawns suitable for all terrains, even for the sunny position. Contains American varieties that will make your lawn a deep green color. Easy to cultivate and with excellent resistance for treading. Particularly resistant to drought. It is sown from spring until the beginning of autumn.

Clean the soil from weeds to avoid thinning. Requires annual ventilations, better if in early spring. Cut regularly at medium height with well blades sharp. To fertilize in all seasons, especially in spring.

CASCADE 1kg

CARATTERISTICHE/ CHARACTERISTICS:

Miscuglio di semi per tappeti erbosi indicato per quei terreni posti in pendenza o scoscesi. Le essenze che compongono questo miscuglio, radicando in profondità ed essendo rizomatose, impediscono al terreno di franare. Ottima resistenza alle più svariate condizioni climatiche. Si semina dalla primavera all'inizio dell'autunno.

MANUTENZIONE/MAINTENANCE:

Non richiede particolari attenzioni; si consiglia al momento della semina di praticare dei leggeri solchi orizzontali nel terreno entro cui depositare il seme. Effettuare il taglio ed eventualmente annaffiare, a seconda delle necessità e dell'esposizione. Concimare regolarmente, specialmente nel periodo primaverile.

Seed mixture for lawns indicated for sloping grounds or steep. The essences that make up this mixture, rooting in depth and being rhizomatous, they prevent the ground from collapsing. Excellent resistance to most various climatic conditions. It is sown from spring to early autumn.

Does not require special attention; it is recommended at the time of sowing to practice light horizontal furrows in the soil within which to deposit the seed. Make the cut and possibly water, depending on the needs and exposure. To fertilize regularly, especially in spring.
